GENERAL DESCRIPTION OF ICT WORKERS' INDIVIDUAL ISSUES

PROPERTY OF THE IMF – DO NOT DISTRIBUTE

1. **FC**: ***Dependence/use of friendship circles***. Socio-professional circles are the primary source of social support that ICT employees rely on in easy as well as difficult times and circumstances. The strength of the support derives from the nurturing and the consolidation of personal relationships with co-workers, colleagues, and professional acquaintances.

2. **JI**: ***Job insecurity***. ICT employees' job insecurity results from the immediate threat to various job features, the seriousness of the threat to the job as a whole, and employees' lack of power to control or nullify the threat.

3. **SE**: ***Self-efficacy***. Professional self-efficacy centers on the question of whether an ICT employee in an organization is capable of carrying out an action to successful completion.

4. **WS**: ***Work satisfaction***. IT workers' work satisfaction in their organizations refers to a state of their positive emotion that arises out of their experiences in the job.

5. **WO**: ***Work overload***. ICT employees perceive work overload to the extent that they are confronted with too many tasks to complete in an insufficient amount of time allotted to them.

6. **WH**: ***Work-home conflict***. Work-home conflict arises when ICT employees experience an imbalance between the time they devote to their jobs and the time they spend at home with their family because of incompatible demands between work and family roles.

7. **WE**: ***Work exhaustion or strain***. Work exhaustion of an ICT employee is a state of mental, emotional, and physical burnout caused by long-term involvement in taxing situations.

8. **TI**: ***Turnover intention***. Turnover signifies that ICT workers leave their present employer to begin working for another employer while still remaining in the ICT profession.

9. **TA**: ***Turnaway intention***. Turnaway signifies the complete abandonment of the ICT profession - a complete career change.
